

Transportation: *Planning and Funding: Evaluation*

Evaluation—

In pupil transportation, the ultimate objective is to provide children with safe transportation to and from school in the most efficient and cost effective means possible. The data and records that are gathered during the normal course of business provide a part of the information necessary to establish the present status of the pupil transportation program. The “Criteria for the Evaluation of District Pupil Transportation Operations,” Appendix 11 to the Standards for Utah School Buses and Operations, provides a framework for effective evaluation. The Board will use this framework, with further modifications as suggested by the District Pupil Transportation Specialist, to determine what changes will make the pupil transportation system more efficient and cost effective.
